

CONTROL SYSTEM AND METHOD OF CONTROLLING INFORMATION WRITTEN INTO STORAGE MEDIA

ABSTRACT OF THE DISCLOSURE

5 A method is adopted in a control apparatus for controlling ID
information stored in a storage medium in conjunction with a terminal for reading the ID
information from the storage medium and used to catalog information for the storage
medium into a memory employed in the control apparatus. In an operation to catalog
information into the memory of the control apparatus, the terminal receives the
10 information, reads the ID information from the storage medium and transmits the
information and the ID information to the control apparatus and the control apparatus
catalogs the information and the ID information in the memory by associating the
information with the ID information. In an operation to examine information already
cataloged in the memory employed in the control apparatus, the terminal reads the ID
15 information from the storage medium and transmits the ID information to the control
apparatus; and the control apparatus transmits the information already cataloged in the
memory and associated with the ID information to the terminal for displaying the
information.
